

S/4HANA: Green, Blue or Brown?

Which implementation path will you take on your S/4HANA journey?

It's not easy being...
Greenfield

An all-new implementation.
New system. New processes.
New headaches.

? Finished? See what happens once the system is live.

New vanilla system goes live with potential capabilities that may or may not match business needs.

Transformation done right:
Bluefield™

CrystalBridge: The SNP transformation command center
S/4 efficiencies in less time with less disruption and fewer risks

New, optimized S/4 system goes live

S/4 efficiencies in less time with less disruption and fewer risks

Making hash with...
Brownfield

Guaranteed incompatibility.
A technical upgrade but little to no new S/4 capabilities or business transformation.

✗ All the pain with no gain.

Technically upgraded system goes live with no S/4 enhancements.
